

# AI and the Catholic Church

**Brendan Newell**  
Principal Architect  
Microsoft

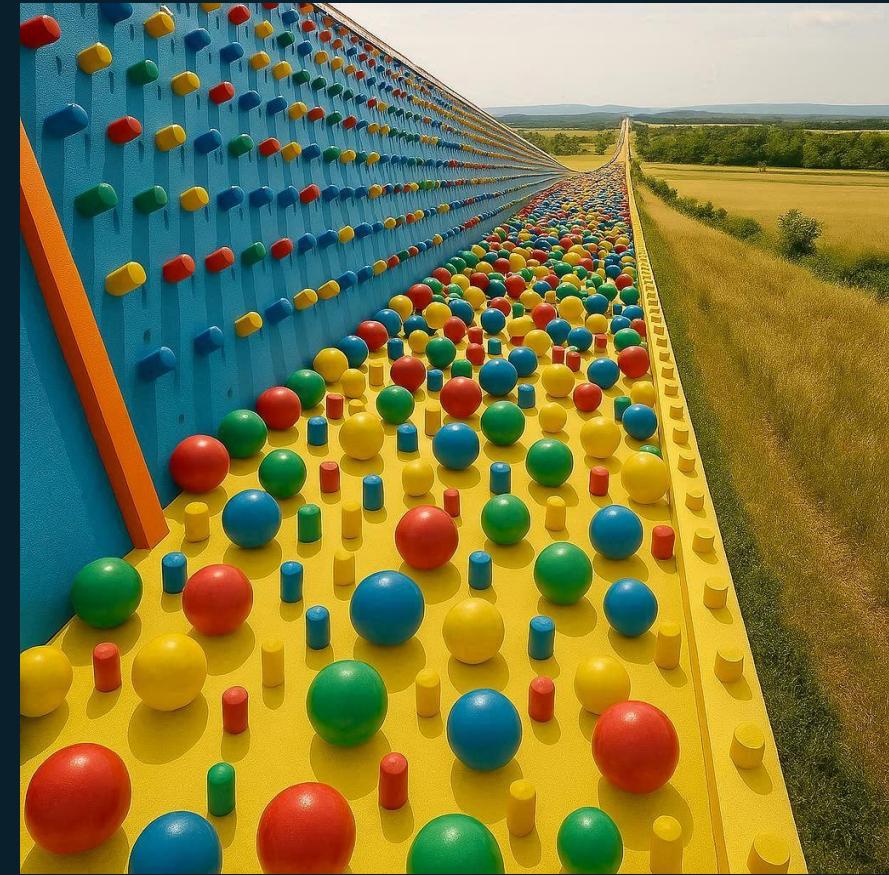

# About Me:

- Parishioner at SS Cyril and Methodius
- Been with Microsoft 27 years
- Focus on Cybersecurity
- Represent Microsoft on Rome Call for AI Ethics.

# What is AI?

In short, it is using Probability at a MASSIVE scale  
Produces something never seen before.

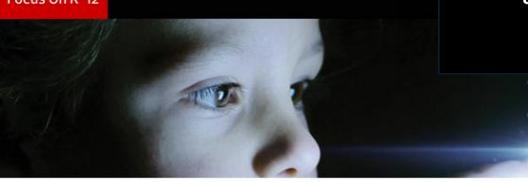

I have a box. My cat likes to sleep in the \_\_\_\_\_

# AI and Society

# Societal expectations are increasing

# Can Administrators Ensure the Ethical Use of AI in K–12 Education?

School and IT leaders should consider these questions before investing in artificial intelligence and machine learning technologies for the classroom.

# The New York Times

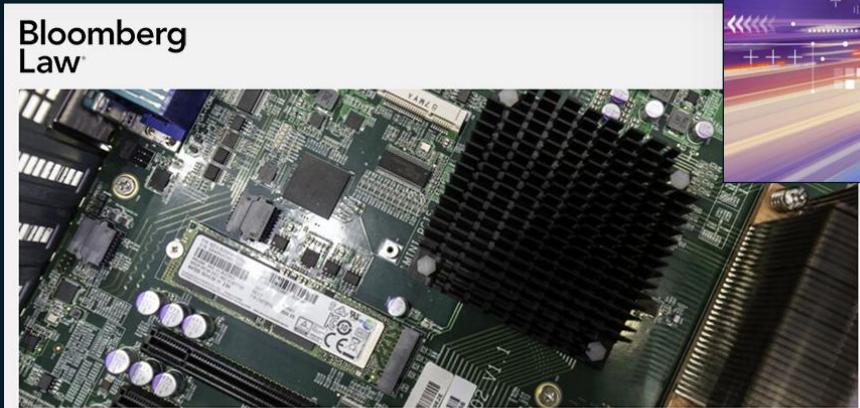

## A.I. Is Mastering Language. Should We Trust What It Says?

A dense collage of text from the 'Stanford Encyclopedia of Philosophy' page on 'Artificial Intelligence' and a Google search result for 'Yale school of management using AI'. The text from the Stanford page discusses the nature of AI, including its relationship to logic, computation, and human intelligence. It also touches on the philosophy of mind and the debate between narrow and wide AI. The text from the Google search result is a snippet from a news article about the Yale School of Management's use of AI in its admissions process, mentioning the use of machine learning to predict student success.

# Yale SCHOOL OF MEDICINE

## How Do Patients Feel About Using AI in Health Care?

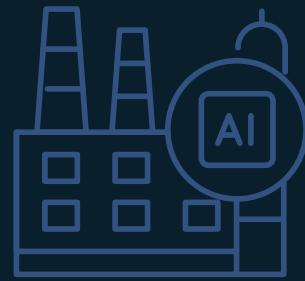

## Disability Bias in AI Hiring Tools Targeted in US Guidance (1)

# The world today...

AI **innovation** is occurring at a rapid pace

Companies are accelerating **adoption** of AI

Societal expectations are **evolving**

Governments are **regulating** AI in response

# The Catholic Response

# Rome Call for AI Ethics

A framework created by the Vatican in 2020 to set a roadmap for Ethical AI

## Antiqua et Nova.

Document from Dicastery for Doctrine of the Faith and Dicastery for Culture

# Rome Call Main Points

Fairness

Reliability  
& Safety

Privacy &  
Security

Inclusiveness

Transparency

Accountability

# The Standard's Goals at a Glance

## Accountability

- A1: Impact Assessment
- A2: What are the adverse impacts
- A3: Fit for purpose
- A4: Data governance and management
- A5: Human oversight and control

## Transparency

- T1: Disclose when AI is used for decision making
- T2: Communication to all involved
- T3: Disclosure of AI interaction

## Fairness

- F1: Quality of service
- F2: Who reaps the benefits
- F3: Minimization of stereotyping, demeaning outputs

## Reliability & Safety

- RS1: Is it 'up' when it is desired?
- RS2: How to recover from failures
- RS3: Ongoing monitoring, feedback, and evaluation

## Privacy & Security

- PS1: Is Data protected?
- PS2: Are the correct Security controls in place?

## Inclusiveness

- I1: Accessibility Standards compliance

# Human Intelligence vs AI

## Human Intelligence is Embodied

Human intelligence integrates sensory experience and emotional depth beyond mere data processing.

## Ethical and Moral Judgment

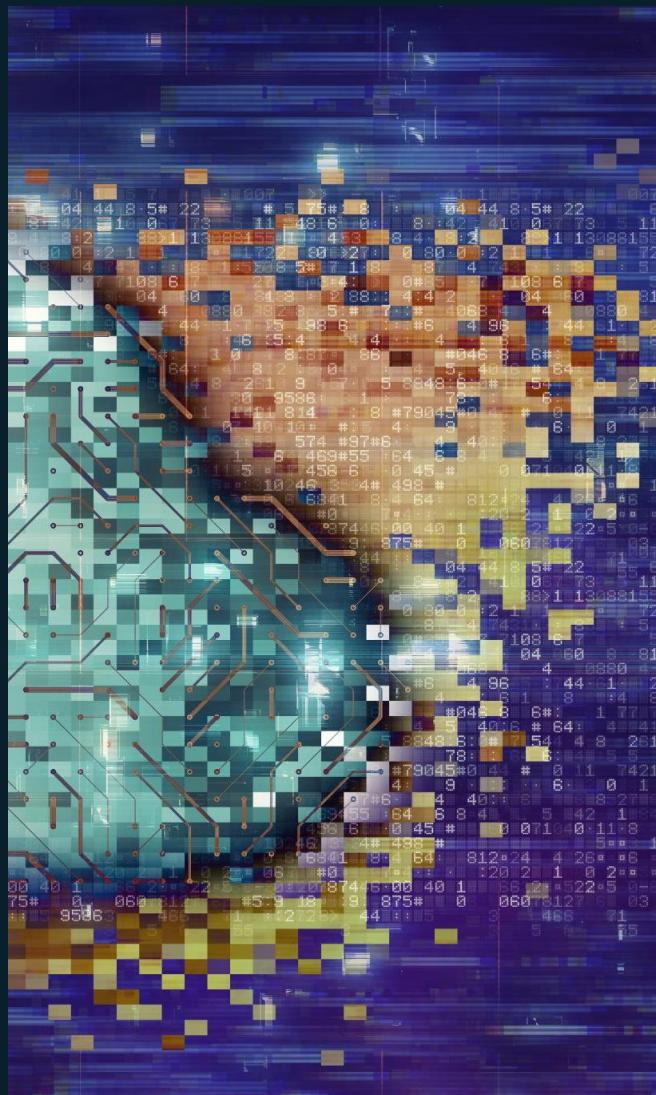

Human cognition includes moral discernment and respect for rights, essential in complex decision-making.

## Relational Intelligence and Community

Human intelligence thrives in dialogue and community, fostering creativity and cultural growth.

## Distinct Role from AI

AI can augment but cannot replace uniquely human wisdom, virtue, and moral responsibility.

# Limits of AI: Absence of Understanding and Morality

## **Lack of Genuine Understanding**

AI has no real intelligence.

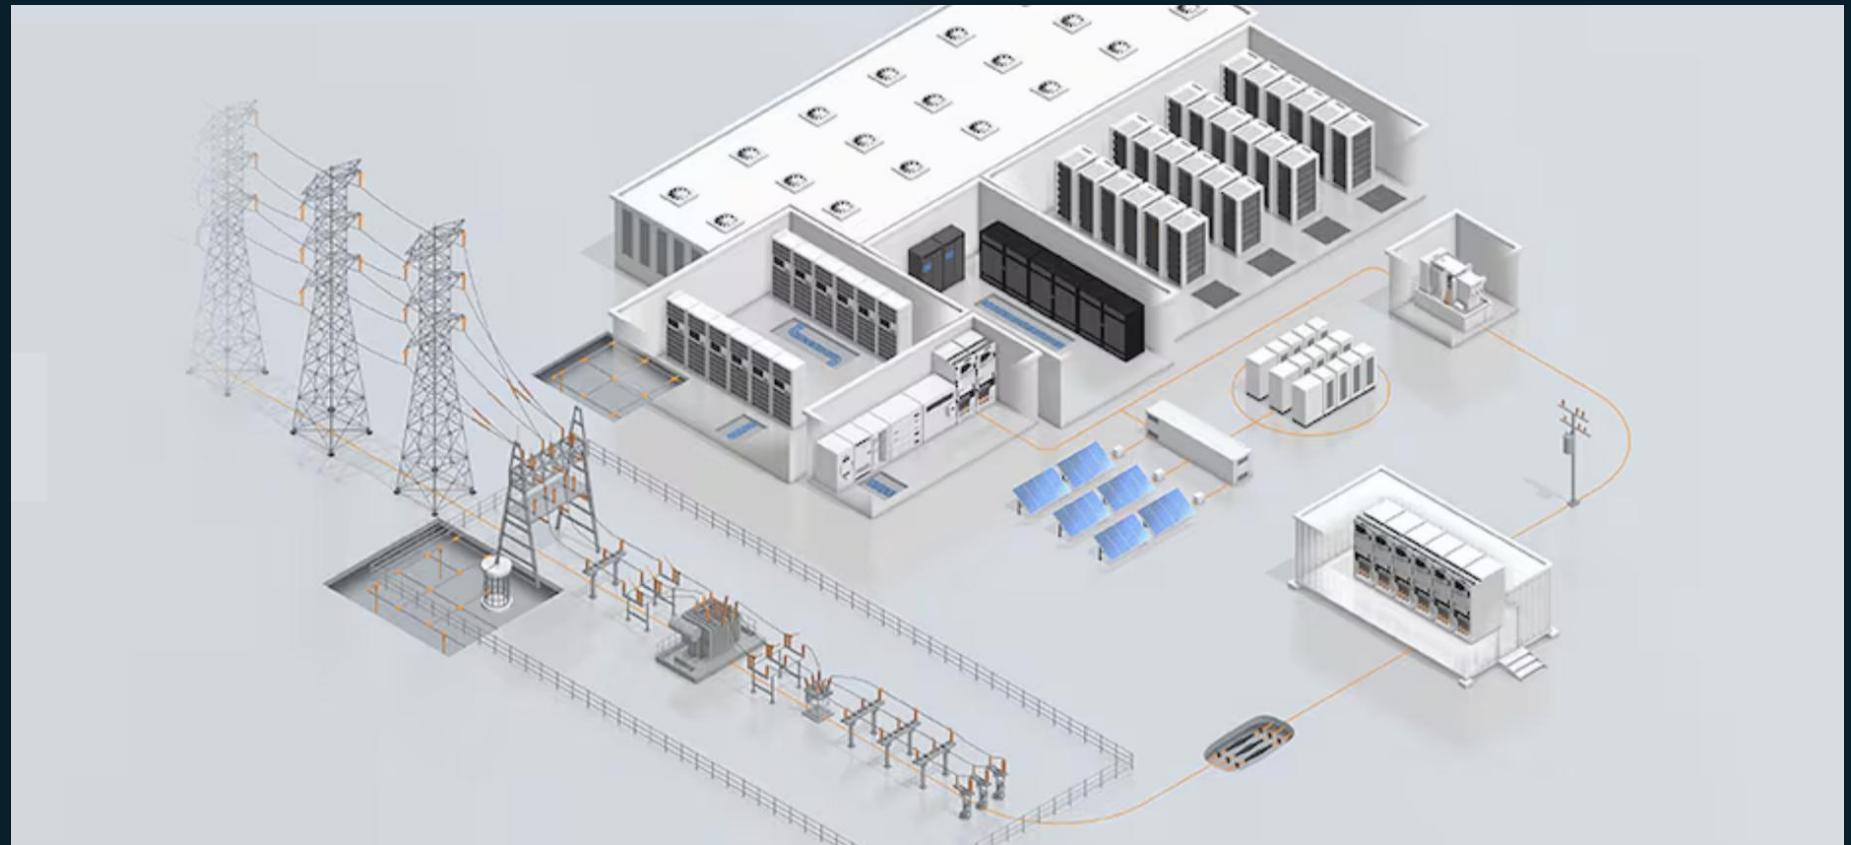

## **Absence of Moral Agency**

AI cannot experience empathy, justice or mercy. It has no sense of ethical responsibility.

## **Need for Human Oversight**

# Responsible AI Considerations

# Power Consumption\Environment

# Economic Impact

# Digital Divide

# Digital Crime

# Social Misuse

# Questions?
